1 OVERVIEW

We use GitHub Issues to manage our bugs. We choose this mainly because it can interact with commits in our GitHub repository, and is helpful for team members to communicate.

We have created a template for bug reporters to submit their bugs. Inserting pictures is allowed. Once a bug is reported, all members can comment on it. After a bug is fixed, we can close it manually or automatically close it in a commit.

2 TEMPLATE

Issue: Bug report

Create a report to help us improve. If this doesn't look right, [choose a different type](#).

Bug Report Template

Write

Preview

Describe the bug
A clear and concise description of what the bug is.

Possible related components
Reference: path/package.class#method()

To Reproduce
Steps to reproduce the behavior:

1. Go to '...'
2. Click on '....'
3. Scroll down to '....'
4. See error

Expected behavior
A clear and concise description of what you expected to happen.

Screenshots
If applicable, add screenshots to help explain your problem.

Environment

- OS: [e.g. iOS]
- IDE: [e.g. IntelliJ IDEA, Eclipse IDE]
- Version [e.g. 22]
- JDK/JRE version [e.g. JDK-11]

Additional context
Add any other context about the problem here.

 Styling with Markdown is supported

Submit new issue

ⓘ Remember, contributions to this repository should follow our [GitHub Community Guidelines](#).

3 EXPLANATION

Here is the detailed explanation of each part of our bug report.

3.1 Describe the Bug

The reporter needs to give a general description of the bug. We recommend it to be clear and concise.

3.2 Possible Related Components

The reporter is expected to predict where the bug might be in our project structure. This is optional because sometimes it is difficult to predict, and sometimes the reporter may not be responsible for the area where the bug occurs.

e.g., src/metroSystem.Database

3.3 To Reproduce

The reporter must give detailed steps on how to reproduce the bug, as this is important for the developer to locate the bug.

3.4 Expected Behavior

The reporter can explain what the program will behave if no bug is present or what is their “ideal” behavior. This is optional.

e.g., The station name should be "Jordan" instead of "Jordon".

3.5 Screenshots

The reporter can paste screenshots of the bug here. This is also optional but recommended.

3.6 Environment

The reporter needs to state the environment where he/she finds the bug. Specially, the OS, IDE, Version, JDK version.

e.g., macOS Monterey 12.0.1, IDEA 2021.3, Version 1.0, JDK 17.0.1.

3.7 Additional Context

This is for the reporter to explain any additional information and is optional.

3.8 Assignees

This is shown in the sidebar on the right. Once a bug is reported, it will be assigned to one or more developers to fix.

3.9 Communication Between Members

This is a great feature of GitHub Issues. After a bug is reported, members can communicate on the bottom of this bug to express their own ideas or provide additional information.

e.g., Alex Xu: “Although there is a bug in ‘Least station’ criteria, this is normal under ‘Least time’ criteria.”

4 ISSUES

We have created 7 issues in GitHub in total. GitHub automatically generates a number for each of them. Here are the screenshots of these issues.

4.1 Issue #66

The screenshot shows a GitHub issue page for the repository 'Alex-XJK / CS3343_Group6'. The issue title is 'The database cannot load any data #66'. The issue is closed and was opened 28 days ago by Alex-XJK. The issue description includes a detailed bug report, steps to reproduce, expected behavior, screenshots of a terminal error, and environment details. The issue has been confirmed by a collaborator and a bugfix has been provided. The right sidebar shows the issue's metadata, including assignees, labels, projects, milestones, linked pull requests, and notifications.

The database cannot load any data #66

Alex-XJK commented 28 days ago · edited · Owner

Describe the bug
After I updated to "Merge pull request #59", the whole program failed to start up. When I try to run your latest version program, it throws an unhandled exception called "IllegalStateException", which seems to be caused by the "loadStation()" function in your "Database" class, but as a user, I do not know where it is actually caused, so I attached a screenshot below, hope it will be helpful to you.

Possible related components
src\metroSystem\Database\data\stations_SZ

To Reproduce
Steps to reproduce the behavior:
1. Pull down your latest version after the "Merge pull request" `!- szMapCompleted #59`
2. Go to "metroSystem" package
3. Switch to "Main.java" file
4. Run the program by clicking on "run"
5. See error

Expected behavior
The program should be able to run successfully without any difficulties, namely no matter what is the output result, there should be no exception throwing out and the database should be loaded by the system.

Screenshots

Environment

- OS: Windows 11
- IDE: IntelliJ IDEA
- Version: 2021.2.2
- JDK 11.0.13

Additional context
Personally, I think there may be something wrong inside your database file, maybe a new structure that goes wrong?

Alex-XJK added the **bug** label 28 days ago

Alex-XJK assigned wlu283 28 days ago

Alex-XJK linked a pull request that will close this issue 28 days ago
Lw dev #67

CONFIRMED
The bug has been confirmed to be reproducible. It seems that the newly modified data file format does not match the old data read method well.

x2-cs closed this in #67 28 days ago

wlu283 commented 28 days ago · Collaborator

BUGFIX
The structure of the related data files has been adjusted in the latest changes and this issue has been resolved.

Wrong English station name #70

Closedxz-cs opened this issue 28 days ago · 2 comments

Describe the bug

In the Hong Kong Train map, "Jordan" is spelled as "Jordon", which results in a NullPointerException.

Possible related components

src/userInterface/MTR_eng

To Reproduce

Steps to reproduce the behavior:

1. Launch the main user interface

2. Find the station "Jordon" which is a wrong spelling

Expected behavior

It should be "Jordan".

Screenshots

Environment

• OS: All

• IDE: All

• Version current

• JDK/JRE version 17.0.1

Additional context

Should be very easy to correct the spelling.

Describe the bug

I was prompted by your system to walk to Shenzhen for a while when I am looking for two mtr stations in Hong Kong, which seemed unreasonable.

Possible related components

src/metroSystem.CrtStation#findRoute(int, int)

To Reproduce

Steps to reproduce the behavior:

- Go to 'Main'
- Click on 'run'
- When we search the route from "Siu Hong" to "Lo Wu" using the "Minimal Station Number"
- See error

Expected behavior

I think it should promote to me the route which is all located inside HK

Screenshots

Environment

- OS: Windows
- IDE: IntelliJ IDEA
- Version 2021.2.2
- JDK/JRE version 11.0.13

Additional context

Not sure whether this is a bug or a special feature?

...

Describe the bug

The three very important buttons: "Traffic Map(HK)", "Traffic Map(SZ)", and "Find Path" cannot be shown when I maximize the software window to full screen.

Possible related components

src/userInterface.Main#main()

To Reproduce

Steps to reproduce the behavior:

1. Download your latest version after "Pull Request" → Preparation for new fully functional release #81"

2. Go to your main code

3. Click on run

4. Maximize the promoted UI window to full screen

5. You may lose those buttons

Expected behavior

No matter where they are (probably due to your responsive design?), at least I should be able to find those three buttons within the screen.

Screenshots

Environment

- OS: windows 11
- IDE: IntelliJ IDEA
- Version 2021.1.4
- JDK/JRE version JDK-11

Additional context

By the way, my screen is 1920*1080 in size, with a 60.05Hz refresh rate.

4.5 Issue #91

Alex-XJK / CS3343_Group6Public

Watch1Star1Fork0

<> CodeIssuesPull requestsActionsProjectsWikiSecurityInsights

Cannot show the result (highlighting edges) correctly when
resize the program window #91

Closedwliu283 opened this issue 20 days ago · 1 comment

wliu283 commented 20 days ago

Collaborator

Describe the bug

When I want to use this mar helper to find the route from "Kowloon Tong" to "Kowloon Bay", I saw some red lines in the screen showing me all stations I need to follow, but what happened is that when I want to resize this app window to make it bigger, all those highlighting red lines are gone and the whole layout was changed totally, I clicked the "Find Path" button again, but nothing happened, and red lines are still gone,

please help to follow up.

Possible related components

Reference: Source/MetroSystem/src/userInterface, probably is main frame or Map.java which is responsible for the whole map display.

To Reproduce

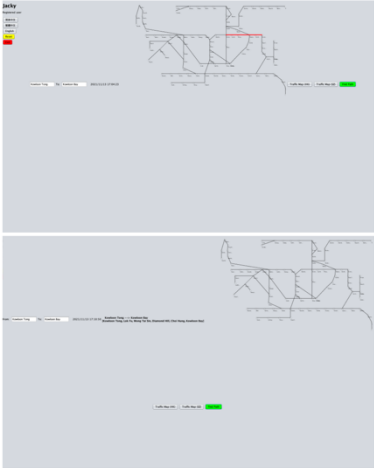

Steps to reproduce the behavior:

1. Download your latest version after "Pull Request Preparation for new fully functional release" -> [New released version #78](#)
2. Go to your main.class inside userInterface package
3. run Main function
4. select randomly 2 stations
5. click "find path" button
6. you may see there is no result path highlighting and the whole layout changes totally

Expected behavior

The result path should be highlighted using red lines.

Screenshots

Environment

- OS: IOS
- IDE: IntelliJ IDEA, Eclipse IDE
- Version: release -> [New released version #78](#)
- JDK/JRE version JDK-11

Additional context

Maybe it would be better to fix the layout. Changing the position of different components every time clicking "find path" button makes the whole program hard to use.

Daisy-127 commented 19 days ago

Collaborator

The program window will repaint every time when the panel is refreshed. After the showResult function is executed, the paint function is called again because of the change in position, therefore, the highlighted line is gone.

4.6 Issue #92

Alex-XJK / CS3343_Group6Public

Watch1Star1Fork0

<> CodeIssuesPull requestsActionsProjectsWikiSecurityInsights

The MTR helper cannot calculate and give me correct shortest path, or at least it cannot be displayed in the screen #92

Closedwliu283 opened this issue 20 days ago · 1 comment

wliu283 commented 20 days ago

Collaborator

Describe the bug

I am a year 1 student this year and just new to Shenzhen. MTR in Shenzhen is so complex so I want to use your MTR helper to find the shortest path. I just searched the path from Shenzhen University to Bo'an, but your program give me the shortest path from Linda to Honglang North. There must exist some bugs in your program. Please help to fix it.

Possible related components

Reference: MetroSystem/src/userInterface

To Reproduce

Steps to reproduce the behavior:

1. Download your latest version after "Pull Request Preparation for new fully functional release New released version [Alex dev #79](#)"
2. Go to your main.class inside userInterface package
3. run Main function
4. select from Shenzhen University to Bo'an
5. click "find path" button
6. you may see the highlight path is from Linda to Honglang North

Expected behavior

The highlight path should be the shortest path from Shenzhen University to Bo'an

Screenshots

Environment

- OS: iOS
- IDE: IntelliJ IDEA, Eclipse IDE
- Version New released version [Alex dev #79](#)
- JDK/JRE version JDK-11

Additional context

To tell the truth, the UI of your program is pretty clear and easy to use.

Daisy-127 commented 19 days ago

Collaborator

The background development data transmission does not subtract the total number of stations in Hong Kong

Unexpected long path under least time criteria #93

Closedxz-cs opened this issue 19 days ago · 1 comment

Describe the bug

The behave is incorrect regarding the least time criteria.

Possible related components

Reference: path/package.class#method()

To Reproduce

Steps to reproduce the behavior:

1. Go to main frame

2. Choose least time criteria

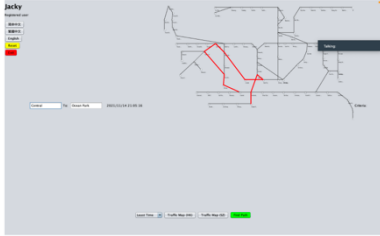

3. Choose Central and Ocean Park

4. Click on Find Path, a very long path -- [Central, Hong Kong, Kowloon, Tsing Yi, Lai King, Nam Cheong, Austin, East Tsim Sha Tsui, Tsim Sha Tsui, Admiralty, Ocean Park] is shown.

Expected behavior

The path should be [Central, Admiralty, Ocean Park] instead of the long path.

Screenshots

Environment

- OS: macOS 12.0.1
- IDE: IntelliJ IDEA
- Version: Latest
- JDK/JRE version: 17.0.1
